Re: Health Advisory Update, Somers Water District

Dear Morey:

At the conclusion of our meeting on February 23, 1987, it was agreed that a written public notice would be issued when the results of chemical sampling were available. Unfortunately, the initial chemical results are inconclusive. Nevertheless, the public needs to be given a current status of the system.

I have taken the liberty of writing a health advisory update which you can use to notify water customers. This may be used in its original form or you may decide to make some changes. Please let me know if you make any changes and send me a copy of the final version. The update needs to be issued as soon as possible. The date that the update is issued needs to be provided to our office.

I have discussed the enclosed update with Eric Fink, EPA, and Ed Michalewicz, FFCHD.

Sincerely,

A handwritten signature in cursive script, appearing to read "Roy A. Wells".
